EDUCATION

S.R.M. Institute of Science and Technology 2023 – 2027
B.Tech in Computer Science and Engineering | *CGPA: 9.40* Ghaziabad, India

EXPERIENCE

LABMENTIX June 2025 – Sep 2025
Full Stack Web Development Intern Bangalore, India

- Developed and integrated RESTful APIs using Node.js, Express.js, and Django to support backend business logic and application workflows.
- Optimized API response handling and frontend assets, achieving an approximately 20% reduction in page load time.
- Debugged backend and frontend issues, improving application reliability and resolving functional and performance bottlenecks.

PROJECTS

Distributed Job Scheduler | *TypeScript, Node.js, Express, BullMQ, Redis, PostgreSQL, Docker*

- Built a distributed job scheduling platform with REST APIs, CRON-based scheduling, job queues, retries, execution tracking, and worker coordination using BullMQ and Redis.
- Developed PostgreSQL-backed job and run management with Prisma, authentication, validation, rate limiting, and structured error handling.
- Containerized the application with Docker Compose, automating database migrations and service orchestration for reproducible deployment.

Online Shopping System | *PHP, MySQL, JavaScript, HTML, CSS, Bootstrap*

- Engineered a full-stack e-commerce platform with secure authentication, product catalog, shopping cart, order management, and role-based admin functionality.
- Designed and integrated a relational MySQL database supporting products, users, carts, orders, and inventory through optimized CRUD operations.
- **Links**: GitHub | Live Demo

Fake News Detection | *Python, NLP, Scikit-learn, Pandas*

- Developed a machine learning model using Python and Pandas to classify news articles as real or fake from a dataset containing over 44,000 articles.
- Applied Natural Language Processing (NLP) techniques and trained a Logistic Regression classifier using Scikit-learn, achieving approximately 98.6% prediction accuracy.

SKILLS

Languages : C++, Python, JavaScript, SQL, C
CS Fundamentals : Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC
Backend : Node.js, Express.js, Django, REST APIs
Databases : MySQL, Redis
Tools : Git, GitHub, Linux, Docker, CMake, VS Code
Concepts : Distributed Systems, API Design, Debugging & Troubleshooting
