SUMMARY

Computer Science undergraduate with a 9.40 CGPA and hands-on experience in Data Science, Machine Learning, NLP, backend development, and data-driven systems. Skilled in Python, SQL, C++, JavaScript, and REST APIs, with experience in data processing, ML model evaluation, ETL concepts, distributed systems, and database-driven applications.

EDUCATION

S.R.M. Institute of Science and Technology 2023 – 2027
B.Tech in Computer Science and Engineering | *CGPA: 9.40* Ghaziabad, India

EXPERIENCE

Research Experience 2026
Researcher | DevOpsAI: An Analytical Study of AI-Driven Automation in Modern DevOps Pipelines SRM IST

- Investigated AI-driven automation in modern DevOps pipelines through literature review and controlled evaluation of predictive and self-healing ML models.
- Analyzed and evaluated anomaly detection, forecasting, and self-healing architectures using LSTM, XGBoost, Isolation Forest, Prophet/ARIMA, and PPO-based reinforcement learning.
- Demonstrated an 82% reduction in MTTD, 79% reduction in MTTR, 54% decrease in change failure rate, 4.5× increase in deployment frequency, and 68% autonomous fault resolution.

PROJECTS

Distributed Job Scheduler | *TypeScript, Node.js, Express, BullMQ, Redis, PostgreSQL, Docker*

- Built a distributed job-processing platform with 12 REST API endpoints, BullMQ/Redis queues, CRON scheduling, and up to 3 automatic retry attempts.
- Implemented PostgreSQL-backed execution tracking, validation, rate limiting, and structured error handling.
- Containerized 2 worker services with Docker Compose, supporting 5 concurrent jobs per worker and validated by 50/50 passing tests.

Fake News Detection & NLP Classification | *Python, NLP, Scikit-learn, Pandas*

- Processed 44,898 labeled news articles using NLP preprocessing including tokenization, stopword removal, and Porter stemming.
- Engineered 10,000-dimensional Bag-of-Words features with CountVectorizer and trained models using an 80/20 train-test split.
- Compared 3 classifiers, with Logistic Regression achieving 98.6% accuracy, 98.4% precision, 98.8% recall, and 98.6% F1-score.

CERTIFICATIONS

Data Science & AI : NPTEL Elite – Natural Language Processing (67%, 2026) | NPTEL – Data Science (2026) | Infosys – Python for Data Science (2026)

Software Engineering : Deloitte Technology Job Simulation, Forage (2025) | The Complete 2024 Web Development Bootcamp – Angela Yu

Programming : HackerRank – Python (Basic) (2024) | HackerRank – Java (Basic) (2024)

SKILLS

Languages : Python, SQL, C++, JavaScript, C
Data & AI : Data Science, Machine Learning, NLP, Data Processing, ETL Concepts, SQL Scripting
Databases : MySQL, PostgreSQL, Redis
Backend : Node.js, Express.js, Django, REST APIs
CS Fundamentals : Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, SDLC
Tools : Git, GitHub, Linux, Docker, CMake, VS Code
Concepts : Distributed Systems, API Design, Debugging & Troubleshooting, CRUD Operations
